

Oregon GEO ArcGIS Online Program

The Oregon Geospatial Enterprise Office (GEO) is offering the chance to take advantage of a no-cost seat with Oregon ArcGIS Online. This opportunity is based on the state's current Enterprise License Agreement (ELA) with ESRI. Details are as follows:

1. Seat is free for current biennium (until July 2015) when a county agrees to participate in the data sharing/stewardship agreement for all Framework data elements collected by the county. A list of Framework data elements is included.
2. Upon signing the agreement, the county will also receive 20 ArcGIS Online credits, 10 of which are valid until June 2014, and 10 of which are valid until June 2015. Suggested best practices and an example of credit usage per service are included.
3. Credits will also be made available for purchase at the rate of \$0.10 per credit if the county uses more than the allotted credits.
4. GEO will help set up participating counties with an ArcGIS Online website, with links to commonly used maps, data elements, and applications. These websites will be under administrative control of the counties. As part of the set up process, GEO will help the county ArcGIS Online administrator create access levels for intended users, so that maps, data, and applications can be shared to the general public, other agencies, or editing contributors as needed.
5. ArcGIS Online seat will include ESRI's Collector application, which will allow the county access to data collection using mobile devices, such as smart phones or tablets.
