Enhance Workflows by Pairing Apps

Collect and Monitor

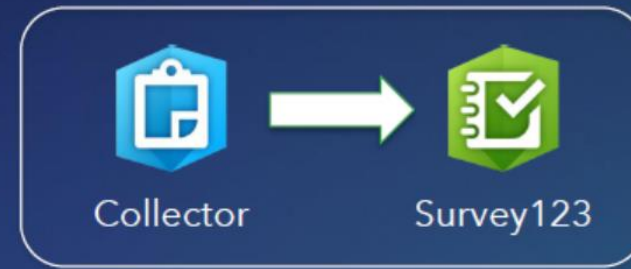

Third Party Integrations

Workforce Launchpad

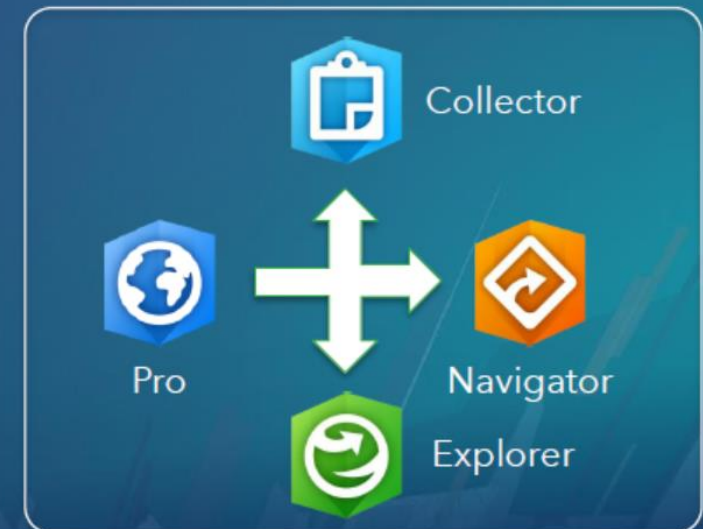

Maps + Forms

Forms + Maps

Prepare - Field

Explorer for ArcGIS

Your maps in your mobile device

Your maps anywhere

Access information while disconnected

Sketch, annotate, and communicate

Survey123 for ArcGIS

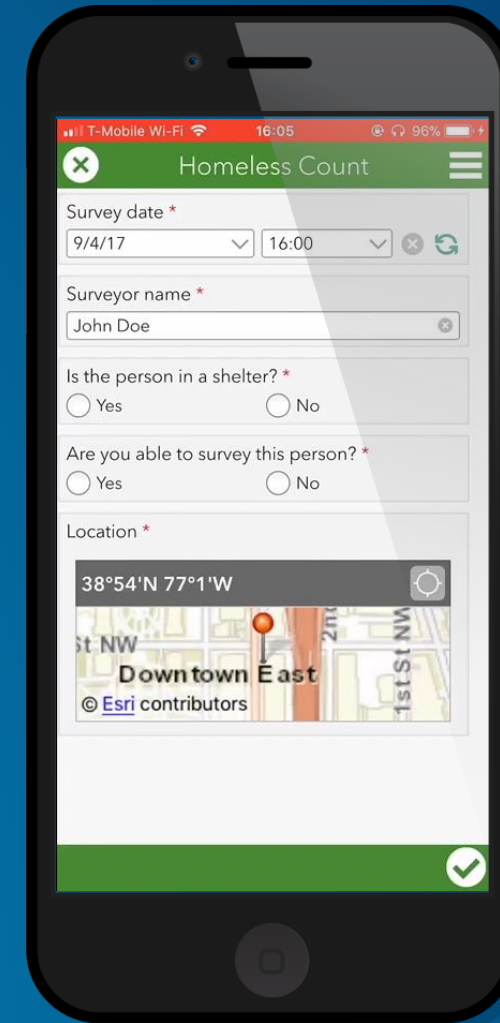

Form-Centric Data Collection

Simple data collection experience

Web & Native / Desktop & Devices

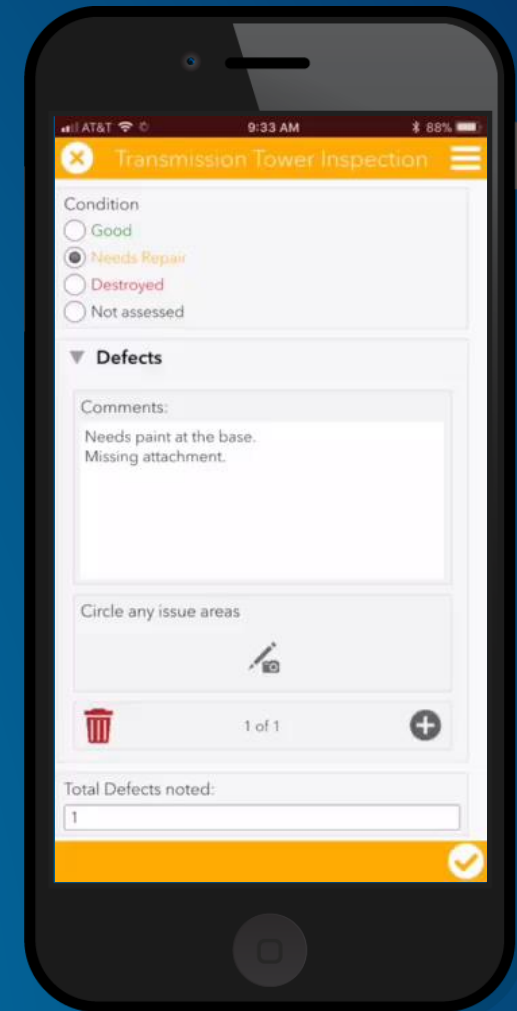

End to end data collection workflow

Survey123 apps

Web app and Field (native) app

- **Survey123 web app**
 - Nothing to install
 - Runs on your browser
 - Online surveys
- **Survey123 Field app**
 - iOS, Android, Windows, Mac, Linux
 - Works offline and online
 - Add and Update point features
 - Sensors and advanced features

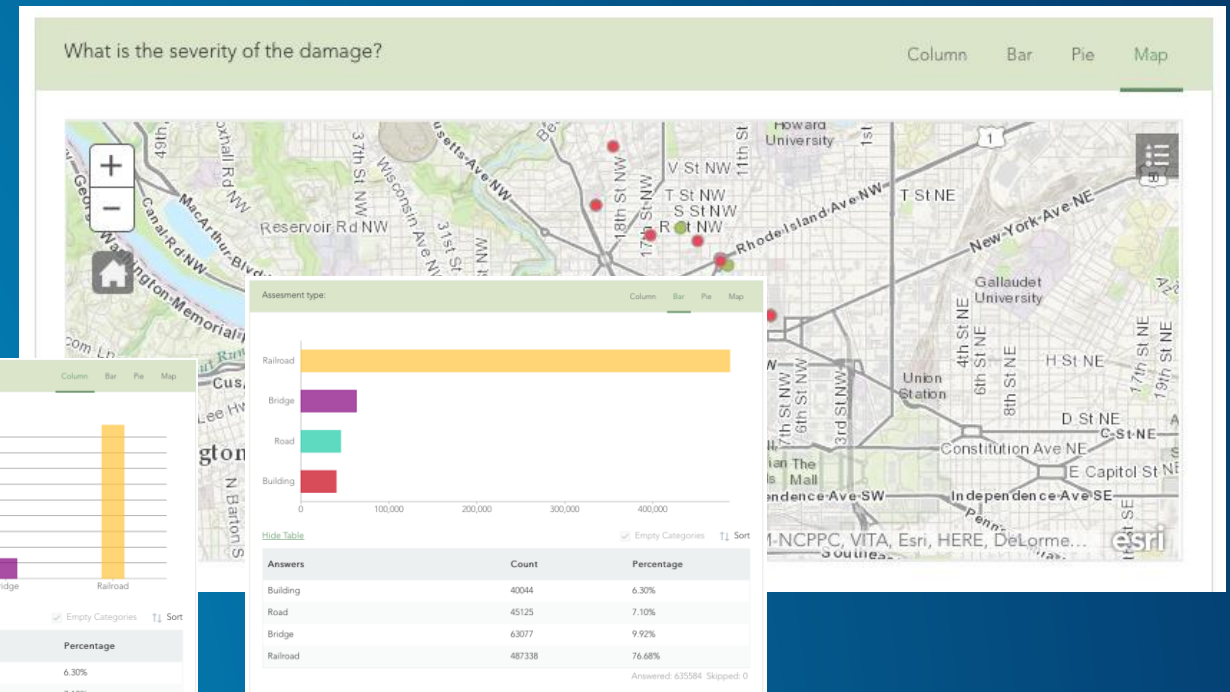

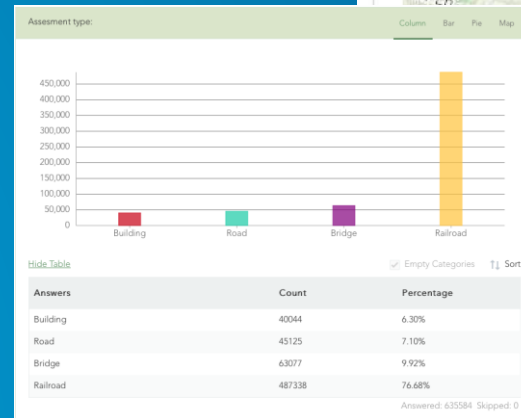

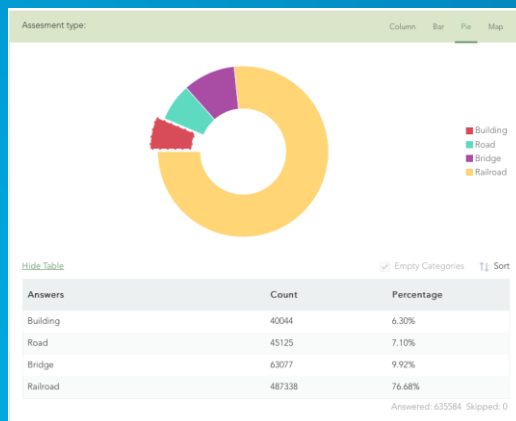

Analyze Survey results

Custom Reports, Trends, Visualization....

- **Ready to use Reporting tools**

- Understand data submission patterns
- Create detailed survey reports
- Aggregate survey data
- Selectively download data

Survey123 and Webhooks

- Webhooks are a widely supported method used to allow multiple applications to interact with each other, using HTTP POST requests to pass callbacks between them.
- Common uses for webhooks include sending notifications via email or SMS, posting messages to social media, automatically writing records to a spreadsheet, and updating enterprise databases.
- Survey123 supports webhooks to be set up and activated when a survey response is submitted.
- Automating workflows with Survey123 and Microsoft Flow
